# Assignment: Dojo Survey Revisited

Objectives:

- Implement a redirect after handling form data
- Store form data in session

Modify your Dojo Survey so the route handling POST data redirects.

The goal is to help you get familiar with sending POST requests through a form and redirecting after handling form data.

1. Alter function that handles form data to return a redirect
2. Store form data in request.session
3. Redirect to view that shows new user's information
